

**MAD Education, in conjunction with the Fascial Manipulation Institute presents Fascial Manipulation
Level 2b Hybrid Course**

The Fascial Manipulation Level 2 course builds on the knowledge of the level 1 course to develop a complete understanding of the musculoskeletal model used in the FM method. In this course, you will learn about the Centres of Fusions (CF) that form the myofascial diagonals and spirals of the body. By learning the function of the CFs, the practitioner will understand how complex movement combining the three planes occurs, providing insight into the evolution of the fascial system, and more importantly, how this knowledge assists in understanding how dysfunction can occur in the CFs based on the presenting condition. With this combined knowledge, clinicians will be able to assess the fascial system and effectively treat myofascial pain and restore normal tissue mechanics. The course includes:

- Online lecture material to understand the anatomical and biomechanical basis of Fascial Manipulation
- Three days face to face to learn the practical components
- Live, online Q&A's to further enhance integration of the Fascial Manipulation method into clinical practice and to share case studies.

The course will be presented by Julie Ann Day, an Australian-Italian physiotherapist. Julie brings extensive experience and a wealth of knowledge in Fascial Manipulation, having began studying with Luigi since 1998 and teaching the method since 2003.

When

Friday 21st March to Sunday, 23rd March 2025 from 9:00am to 5:30pm AEDT (Sunday finishes at 5:00pm)

Pre-course online webinar: Tuesday, 11th March from 7:30 – 8:30pm AEDT

Post-course online webinar: Tuesday, 1st April from 7:30 – 8:30pm AEDT

How much: \$2200
